Personal Profile

I am a Business Graduate transitioning into tech. My desire for learning Software Development initiated last year, when, I had the opportunity to complete a 5 Day Coding Challenge online with Code Institute. To set the path to a career in technology, I then completed a Level 2 in Digital Skills. During this course I was able to gain valuable technical and practical skills.

This then urged me to enrol on to a 12-week intensive Software Development Bootcamp. Here I was able to learn and understand the functioning of various programming languages. I relished my time there and got to know that Tech was a profession that I am zealous to proceed with.

With the positivity and problem-solving skills that I possess, I am anxiously looking forward in upgrading my tech skills and taking it to the next level by joining an apprenticeship program. I believe this will enable me to learn and build confidence to begin work as a Junior Software Developer.

Interests and Achievements

Computing: During my spare time I like to browse the internet and look up for something specific or search for things that I am passionate about. This helps me learn something new every day. I also help my family and friend as and when they need help with technical support and troubleshooting.

Hobbies: I enjoy cooking, cleaning, solving puzzles especially word search and jigsaw puzzles. I also like building Legos.
